- EVS: 1. Paste on an A4 size paper :-1 tree, 1 shrub, 1 herb and write sentences on each.
2. Paste pictures of your extended family members and write two sentences on them on an A4 size paper.

Class 4

English

I. Read the passage and answer the questions.

Trees are useful to man in three different ways: they provide him with wood and other products, they give him shade and they help him to prevent drought and floods.

Unfortunately, in many parts of the world, man has not realized that the third of these services is the most important. In his eagerness to draw quick profit from the trees, he has cut them down in large numbers, only to find that with them he has lost the best friends he had.

Two thousand years ago, a rich and powerful country cut down its trees to build warships, with which to gain itself an empire. It gained the empire but, without its trees, its soil became hard and poor. When the empire fell to pieces, the home country found itself faced by floods and starvation.

Everywhere governments realize the importance of a plentiful supply of trees but it is difficult for them to persuade the villagers to do the same. The villagers want wood to cook their food and they earn money by making charcoal or selling wood to the townsmen. They are usually too lazy or too careless to plant and look after new plants. Therefore, unless the governments have a good system of control or can educate the people, the forests will gradually disappear.

Questions:

- Q1. List the advantages of trees to man.
- Q2. Which of these advantages have not been realized by man?
- Q3. What was the result of cutting down of trees by a rich and powerful country?
- Q4. Why do the villagers not see the importance of having trees?
- Q5. What can the government do to save trees?
- Q6. Find out the words with suffix **-ful** from the passage.
- Q7. Find the opposites of the given words from the passage: poor, active, loss, difficult.
