

Tarunotsava' –for class 10 students

To utilize the long gap post Class 10 board examination, the Kendriya Vidyalaya Sangathan launched 'Tarunotsava' – a programme that aims to involve students in various activities including counseling and career guidance services.

KV Ballygunge started the programme from this academic session 2018-19 for the students who appeared in Class 10 examination in 2017-18. As per the KVS circular issued to principals the activities are being organized. Principal K V Ballygunge said, "It is felt that these students stay disconnected from studies and school for more than two months prior to their admission in Class 11. There was no institutional mechanism in place to keep them connected with studies and school meaningfully."

With the consent of parents, the students were enrolled in the activities like improving language skills, focus and development on their hobbies/ skills. They were encouraged to participate in drama, making films and similar activities.

To help students plan what career they wish to pursue, school arranged career guidance sessions. Also, to encourage sports enthusiasts, special sports coaching were introduced.

To strengthen the core competencies required for understanding subjects like mathematics, physics etc, KVS has suggested teachers to develop a module based on basic concepts. These modules will help students understand what subjects interest them and what will they be taught in Class 11.
